P-C2660 MFP P-C2665 MFP

Practical: The 50 sheet original feeder automatically reverses double-sided originals.

Clear: Keep everything under control thanks to the clearly designed control panel.

Versatile: It's even possible to process small formats such as A6R (including checks or prescriptions).

HIGHLIGHTS:

Colour that amazes: Print your presentations, handouts and flyers in colour and make an impression with visually appealing documents. Black and white is no problem either: Print more cost-effectively at the touch of a button!

Important functions – exactly as you need them: Nowadays, almost everyone needs to copy, print and scan. The P-C2660 MFP fulfils these requirements as standard. Do you require additional comprehensive fax functionalities including PC-Fax? If so, the P-C2665 MFP is perfect for you!

Everything flows smoothly: A rate of 26 A4 pages/minute when printing and copying and a maximum of 35 A4 pages/minute when scanning means you never have long to wait for the end result, giving you time to look after more important things. You've also got more support on hand: the standard document feeder for 50 sheets that automatically reverses double-sided originals and the integrated duplex unit. Scan or print documents quickly and simply via USB stick, even without a network connection. All of this makes work a lot more fun!

Diverse range of media for more creativity: Whether it be normal paper or special media such as coated, heavy paper or labels the choice is yours! Both the multi-bypass and optional multipurpose cassette process a wide range of special materials up to 220 g/m² and formats from A4 to A5R or A6R. You won't run out of steam as fast thanks to a maximum paper capacity of 1,300 sheets – even with larger print jobs.
